Spill Prevention

Suzhou Hopetopway New Material Co., Ltd.

Safetyprot Is Hopetopway

Suzhou Hopetopway New Material Co., Ltd. has been engaged in safetyprot products for many years. Hopetopway has a strong R&D team. Hopetopway also has modern factories with multiple production lines. And a large number of meticulous quality control personnel. Hopetopway has passed SGS, BV and ISO9001 certification. Provide global customers with high-quality safetyprot products. Our goal is: Safetyprot Is Hopetopway.

At present, Hopetopway mainly sells two product lines, namely, Spill Prevention& Control and Water Surface Cleaning.

1.Spill Prevention&Control

- Oil Absorbent
- Chemical Absorbent
- Universal Absorbent
- Spill Response Kits
- Spill Containment Berm
- Spill Containment Pallet
- Spill Containment Tray
- Silica Absorbent Granule

2.Water Surface Cleaning

- Float PVC Oil Boom
- Float Rubber Oil Boom
- Oil Spill Dispersant

Hopetopway is located in the economically developed Yangtze River Delta - Suzhou, bordering the scenic Taihu Lake in the west, Shanghai Nanjing Expressway in the north, national highway 312, 80km away from Shanghai and Suzhou Hangzhou Expressway in the south. Hopetopway's products sell well all over the country and are exported to many countries around the world. We serve many industries around the world. We welcome new and old customers and friends from all walks of life to visit, negotiate and cooperate.

Product List

Spill Prevention&Control

Mini Berm Spill Containment Berm.....P25

Foam Wall Berm Spill Containment Berm.....P26

L-Bucket Berm Spill Containment Berm.....P27

Frame Berm Spill Containment Berm.....P28

Spill Containment Pallet.....P29

Spill Containment Workstation.....P30

Integrated Spill Containment Pallet.....P31

Plastic Ramp&Oil Drum Spill Trailer Tray.....P32

Spill Containment Tray.....P33

Silica Absorbent Granule.....P34

Mini Berm Spill Containment Berm

Spill Containment Berm is made of polymer materials. Spill Containment Berm can prevent liquid overflow and diffusion during liquid operation. Spill Containment Berm is also a necessary product to prevent oil leakage and clean up oil leakage.

-Feature

- It has light self weight and is convenient for transportation and storage.
- It has good oil resistance and water resistance, which is conducive to environmental protection and resource recovery.
- It is wear-resistant, sun resistant, reusable, pollution-proof, easy to clean, long service life, high strength and tear resistance.
- It is resistant to tension, puncture, low temperature, ultraviolet and weak acid-base corrosion.

-Application

- It can be used for cleaning, parking and simply isolating aircraft, various vehicles and other various types of machinery and equipment.
- It is used to isolate chemicals, acids, generators and other power equipment. They are often used in workshops or specific areas.

Model	OSB-01
Material	PVC/TPU
Color	Black/Yellow/Orange/or Customized
Size	Customized Size
Thickness	0.7mm/0.8mm/0.9mm/1.0mm/1.2mm/1.4mm/1.5mm
Capacity	Totally Customized
Type	Mini Berm
Function	Control Liquid Spill/Temporary Storage of Liquid/Environment Protection
Packing	PE Bag/PE Bag+Carton/Woven Bag
OEM	Support

Foam Wall Berm Spill Containment Berm

Spill Containment Berm is made of polymer materials. Spill Containment Berm can prevent liquid overflow and diffusion during liquid operation. Spill Containment Berm is also a necessary product to prevent oil leakage and clean up oil leakage.

-Feature

- It has light self weight and is convenient for transportation and storage.
- It has good oil resistance and water resistance, which is conducive to environmental protection and resource recovery.
- It is wear-resistant, sun resistant, reusable, pollution-proof, easy to clean, long service life, high strength and tear resistance.
- It is resistant to tension, puncture, low temperature, ultraviolet and weak acid-base corrosion.

-Application

- It can be used for cleaning, parking and simply isolating aircraft, various vehicles and other various types of machinery and equipment.
- It is used to isolate chemicals, acids, generators and other power equipment. They are often used in workshops or specific areas.

Model	OSB-02
Material	PVC/TPU
Color	Black/Yellow/Orange/or Customized
Size	Customized Size
Thickness	0.7mm/0.8mm/0.9mm/1.0mm/1.2mm/1.4mm/1.5mm
Capacity	Totally Customized
Type	Foam Wall Berm
Function	Control Liquid Spill/Temporary Storage of Liquid/Environment Protection
Packing	PE Bag/PE Bag+Carton/Woven Bag
OEM	Support

L-Bucket Berm Spill Containment Berm

Spill Containment Berm is made of polymer materials. Spill Containment Berm can prevent liquid overflow and diffusion during liquid operation. Spill Containment Berm is also a necessary product to prevent oil leakage and clean up oil leakage.

-Feature

- It has light self weight and is convenient for transportation and storage.
- It has good oil resistance and water resistance, which is conducive to environmental protection and resource recovery.
- It is wear-resistant, sun resistant, reusable, pollution-proof, easy to clean, long service life, high strength and tear resistance.
- It is resistant to tension, puncture, low temperature, ultraviolet and weak acid-base corrosion.

-Application

- It can be used for cleaning, parking and simply isolating aircraft, various vehicles and other various types of machinery and equipment.
- It is used to isolate chemicals, acids, generators and other power equipment. They are often used in workshops or specific areas.

Model	OSB-03
Material	PVC/TPU
Color	Black/Yellow/Orange/or Customized
Size	Customized Size
Thickness	0.7mm/0.8mm/0.9mm/1.0mm/1.2mm/1.4mm/1.5mm
Capacity	Totally Customized
Type	L-Bucket Berm
Function	Control Liquid Spill/Temporary Storage of Liquid/Environment Protection
Packing	PE Bag/PE Bag+Carton/Woven Bag
OEM	Support

Frame Berm Spill Containment Berm

Spill Containment Berm is made of polymer materials. Spill Containment Berm can prevent liquid overflow and diffusion during liquid operation. Spill Containment Berm is also a necessary product to prevent oil leakage and clean up oil leakage.

-Feature

- It has light self weight and is convenient for transportation and storage.
- It has good oil resistance and water resistance, which is conducive to environmental protection and resource recovery.
- It is wear-resistant, sun resistant, reusable, pollution-proof, easy to clean, long service life, high strength and tear resistance.
- It is resistant to tension, puncture, low temperature, ultraviolet and weak acid-base corrosion.

-Application

- It can be used for cleaning, parking and simply isolating aircraft, various vehicles and other various types of machinery and equipment.
- It is used to isolate chemicals, acids, generators and other power equipment. They are often used in workshops or specific areas.

Model	OSB-04
Material	PVC/TPU
Color	Black/Yellow/Orange/or Customized
Size	Customized Size
Thickness	0.7mm/0.8mm/0.9mm/1.0mm/1.2mm/1.4mm/1.5mm
Capacity	Totally Customized
Type	Frame Berm
Function	Control Liquid Spill/Temporary Storage of Liquid/Environment Protection
Packing	PE Bag/PE Bag+Carton/Woven Bag
OEM	Support

Spill Containment Pallet

The Spill Containment Pallet is a polyethylene leakage holding tray which can control leakage and has its own leakage holding tank.

- **Material:** It is made of 100% durable high-density polyethylene.
- **Production process:** It adopts rotational molding process, seamless structure design, and the leak proof structure 100% passes the test. The tray can avoid leakage.
- **Color:** Yellow / custom.
- **Cpecification:** There are many existing specifications for Spill Containment Pallet according to the place of use and function. Support customization according to requirements.

-Feature

- The crimping design around the Spill Containment Pallet can play the role of anti-collision and anti cracking.
- It has a large capacity leakage storage tank.
- It can be used together with the slope, making it easy, fast and simple to move the chemical storage barrel up and down.
- It has a high-strength, movable and removable leakage isolation plate, which is convenient for disassembly and cleaning, and can also be replaced.
- It can become part of the factory floor, saving space, improving safety and efficiency, and making it easier to move oil drums and chemical drums up and down.
- The heavy-duty high-strength anti-skid grid on the surface of the Spill Containment Pallet platform forms a stable base, which increases the friction on the grid surface and makes it safer to walk on the platform surface.
- It is equipped with drain holes and drain plugs. Once the contained liquid reaches a certain amount, the drainage hole can discharge the liquid. Most of the leaked liquid can be reused directly.

Model	Name	Material	External Dimension	Capacity	Load Capacity
SCP-01	4 Drum Spill Containment Pallet	Polyethylene PE	130*130*30cm	270L	2700Kg
SCP-02	2 Drum Spill Containment Pallet	Polyethylene PE	130*70*30cm	150L	1300Kg
SCP-03	4 Drum Enclosure Spill Containment Pallet	Polyethylene PE	130*130*30cm	280L	2700Kg
SCP-04	2 Drum Enclosure Spill Containment Pallet	Polyethylene PE	130*70*30cm	150L	1300Kg
SCP-05	IBC Drum Spill Containment Pallet	Polyethylene PE	155*155*72cm	1350L	1900Kg
SCP-06	Container Spill Containment Pallet	Polyethylene PE	130*110*30cm	250L	2000Kg

Spill Containment Workstation

The Spill Containment Pallet is a polyethylene leakage holding tray which can control leakage and has its own leakage holding tank.

- Material: It is made of 100% durable high-density polyethylene.
- Production process: It adopts rotational molding process, seamless structure design, and the leak proof structure 100% passes the test. The tray can avoid leakage.
- Color: Yellow / custom.
- Cpecification: There are many existing specifications for Spill Containment Pallet according to the place of use and function. Support customization according to requirements.

-Feature

- The crimping design around the Spill Containment Pallet can play the role of anti-collision and anti cracking.

Model	Name	Material	External Dimension	Capacity	Load Capacity
SCP-21	Integrated 2 Drum Spill Containment Pallet	Polyethylene PE	120*80*20cm	100L	1300Kg
SCP-22	Integrated Spill Containment Pallet for Shelf	Polyethylene PE	125*80*20cm	100L	1200Kg
SCP-23	Integrated 4 Drum Spill Containment Workstation	Polyethylene PE	125*125*15cm	80L	1800Kg
SCP-24	Integrated 2 Drum Spill Containment Workstation	Polyethylene PE	125*65*15cm	50L	1800Kg
SCP-25	Integrated One Drum Spill Containment Workstation	Polyethylene PE	72*72*15cm	25L	700Kg

Plastic Ramp&Oil Drum Spill Trailer Tray

Model	Name	Material	External Dimension	Capacity	Load Capacity
SCP-41	Oil Drum Spill Trailer Tray	Polyethylene PE	77*77*112cm	20L	240Kg
SCP-31	Plastic Ramp for Spill Containment Pallet	Polyethylene PE	120*80*30cm	300Kg	-
SCP-32	Plastic Ramp for Spill Containment Workstation	Polyethylene PE	120*80*15cm	300Kg	-

Spill Containment Tray

- Spill Containment Tray can be used to store oily tools and messy accessories.
- Spill Containment Tray are made of durable polypropylene.
- Spill Containment Tray is resistant to oil, acid, alkali and other liquids, and the Spill Containment Tray can effectively prevent liquid leakage.
- Spill Containment Tray is easy to clean and reusable.
- Spill Containment Tray can be used in machinery workshop, automobile maintenance, laboratory and other factory places with harmful liquid leakage.
- Spill Containment Tray can also be used as a battery box.
- Support color and specification customization.

Model	Name	External dimension	Internal dimension	Weight
SCT-4	SCT-4 Small Spill Containment Tray	373*254*65mm	345*225*60mm	325g
SCT-3	SCT-3 Medium Spill Containment Tray	438*293*80mm	410*260*70mm	450g
SCT-6	SCT-6 Medium Spill Containment Tray	440*295*55mm	405*270*50mm	395g
SCT-1	SCT-1 Large Spill Containment Tray	615*405*90mm	585*380*85mm	970g
SCT-2	SCT-2 Large Spill Containment Tray	550*360*80mm	523*340*75mm	800g

Silica Absorbent Granule

Silica Absorbent Granule particles have a multi microporous structure. Silica Absorbent Granule has strong adsorption capacity for leaked pollutant liquids such as diesel, gasoline, engine oil, No. 2 flotation oil, toluene, xylene, kerosene, nitrobenzene, formaldehyde, methanol and ethanol. Silica Absorbent Granule can adsorb pollutant liquid equivalent to 6 times its weight (about 5-6 kg of oil and chemical liquid can be adsorbed per kg of Silica Absorbent Granule). Silica Absorbent Granule provides a low-cost and environment-friendly cleaning scheme for emergency liquid absorption treatment of oil leakage pollution on land and at sea.

Feature

- Silica Absorbent Granule has hydrophilicity, lipophilicity, high liquid absorption rate, fast liquid absorption rate and good oil-water selectivity.
- Silica Absorbent Granule is easy to transport and store, and can float on the water before and after liquid absorption, with high oil retention rate.
- Silica Absorbent Granule has large adsorption capacity, good oil retention, high adsorption efficiency and reduced treatment time. Silica Absorbent Granule can reduce the consumption in the oil cleaning process by 80% and has low cost.

Application

Silica Absorbent Granule is suitable for cleaning the oil slick on the surface of reservoirs, lakes, sea surfaces and sewage tanks of sewage treatment plants. Silica Absorbent Granule plays a great role in adsorbing oil leakage of plant workshop equipment, leakage of liquid storage tank, cleaning of cabin, wharf equipment, cabin oil, diesel leakage or chemical dangerous liquid.

Model	Name	Color	Moisture Content	Weight
SAG-01	5kg Silica Absorbent Granule	Earth-yellow	0.01%	5kg
SAG-02	10kg Silica Absorbent Granule	Earth-yellow	0.01%	10kg
